EXPERT TECHNICAL ENGINEERING REPAIR

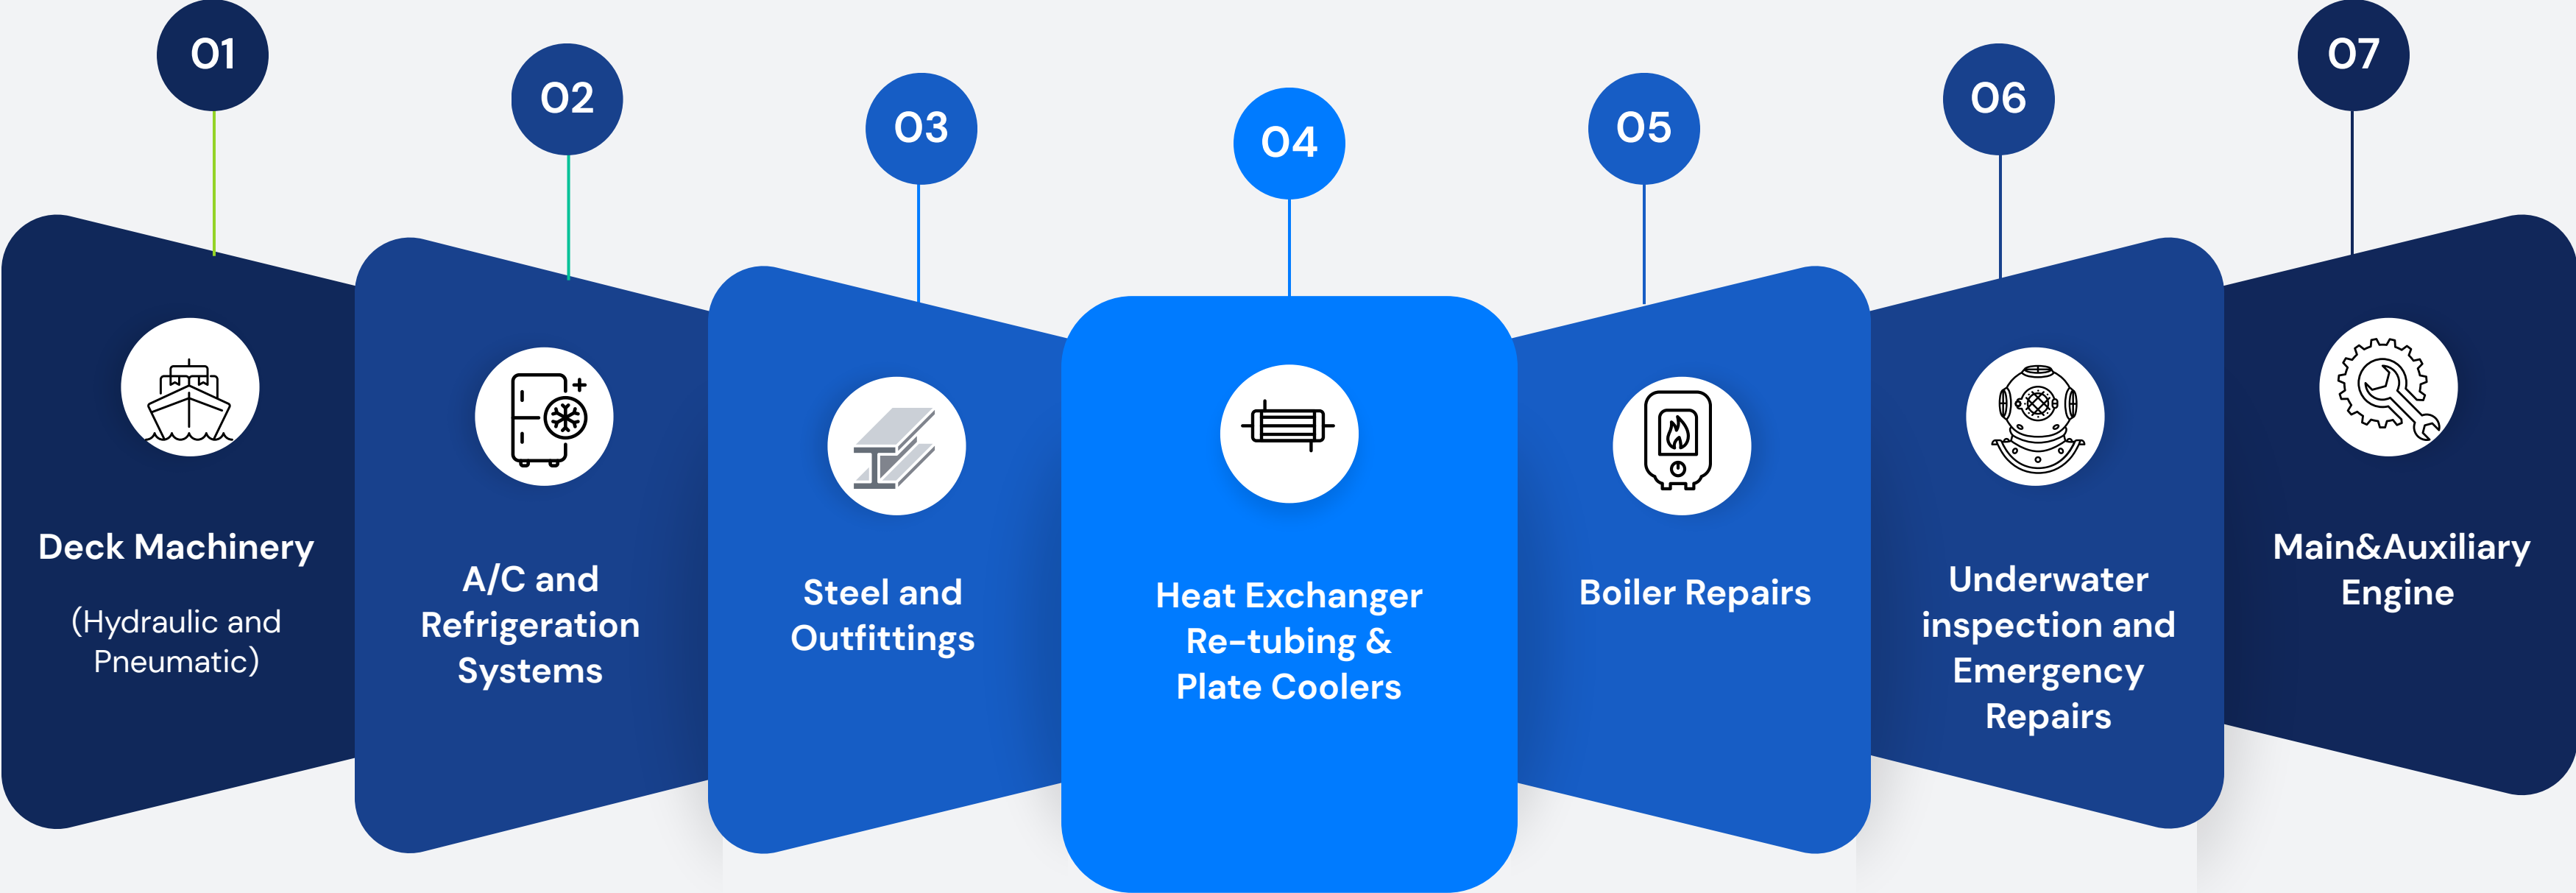

COMPANY PROFILE

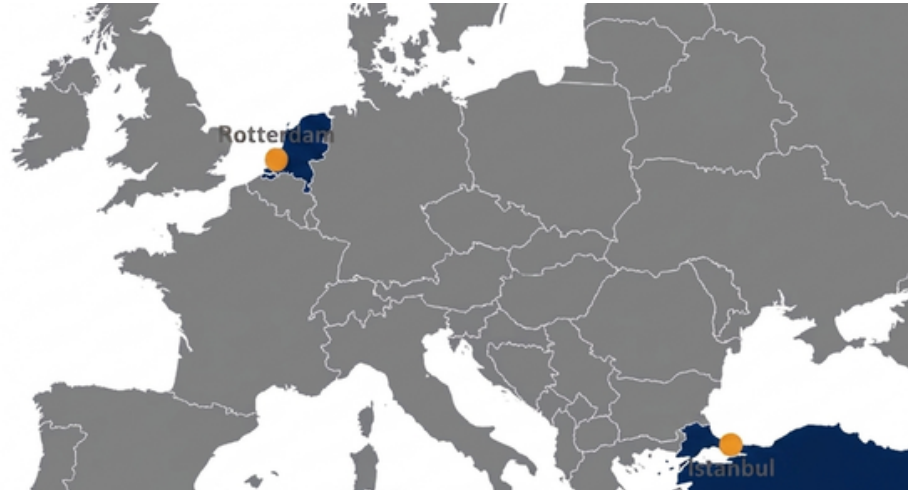

# INTRODUCTION

Etermarine is a premier service provider in the maritime industry, defined by operational agility and rapid response. We recognize that in shipping, time is the most critical factor; therefore, we prioritize fast, flexible, and reliable solutions to keep your operations moving. With a hands-on approach and a commitment to excellence, Etermarine is your dependable partner for seamless efficiency at sea.

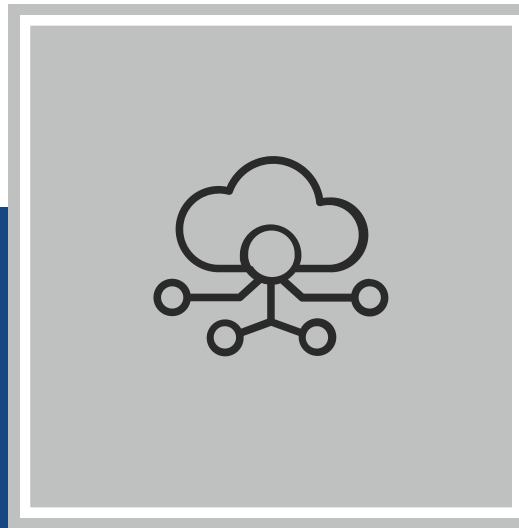

# SHIP REPAIR

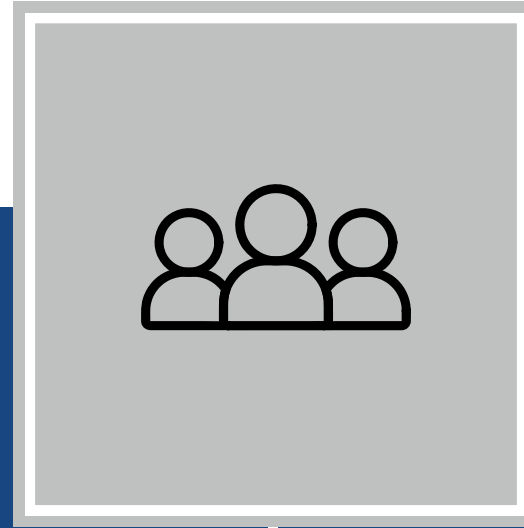

# CORE CAPABILITIES

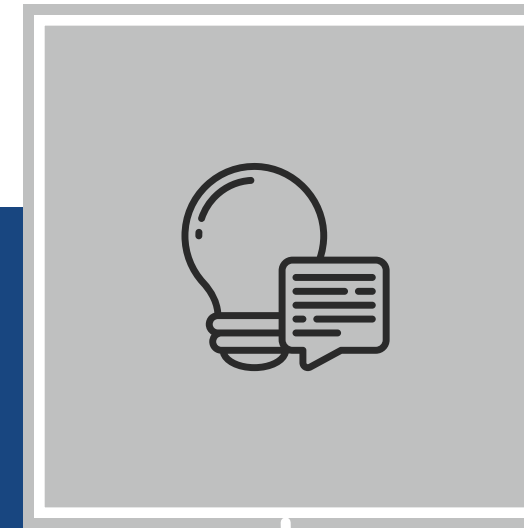

## WORKSHOPS

- Engine Reconditioning Workshop (In Tuzla)
- Mechanical Workshop (In Tuzla)
- Mechanical Workshop (In Rotterdam)

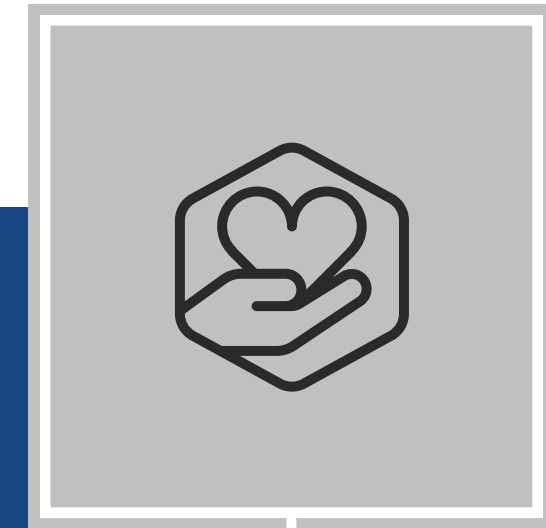

## RIDING TEAMS

- Mechanical & Engine Services
- Electrical & Automation
- Piping and Steel
- Pneumatic & maneuvering system
- Alpha lubricator system

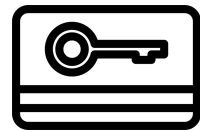

## MARINE CONSULTING

- Dry-docking Projects
- Market Entry & Business Development
- Operational Excellence & Technical Advisory

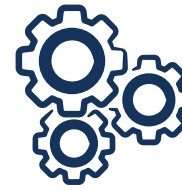

## TECHNICAL SUPPLY & REPRESENTATION

- Technical Spare Parts
- Second-Hand & Reconditioned Parts
- Exclusive Representation

## KEY SERVICES

Etermarine offers a comprehensive suite of technical marine services, combining 16 years of industry expertise with a global network to ensure your vessel's operational excellence.

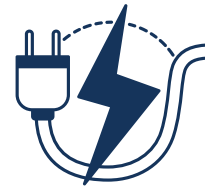

### Main & Auxiliary Engine Overhauls

- Comprehensive maintenance and overhauling services for both 2-stroke and 4-stroke marine engines.

### Steel & Piping Works (Emergency & Routine)

- End-to-end management of dry-docking operations, from technical specifications and yard selection to on-site supervision.

### Electrical & Automation Troubleshooting

- Specialized diagnostic and repair solutions for marine propulsion and integrated automation systems to minimize downtime.

### Tank Demucking & Cleaning:

- Professional tank cleaning and desludging services at all Turkish anchorages and during Bosphorus transits.

# COMPETITIVE ADVANTAGE

---

## 01 Zero-Downtime Focus

We specialize in On-Voyage Repairs. Our riding crews board your vessel and perform critical work while you remain on schedule, avoiding costly port stays.

## 03 Consulting

We don't just provide labor; we provide Intelligence. Our consulting services ensure your dry-docking budgets are respected and your technical risks are mitigated.

## 02 Global Supply Chain Link:

Beyond labor, we act as a logistics bridge, securing high-quality spare parts and technical expertise across major hubs from East Asia to the Mediterranean.

## 04 Cost-Effective Precision

We provide cost effective pricing by maintaining a lean, highly mobile organization that focuses on practical solutions rather than corporate overhead.

STANDARDS YOU CAN TRUST

# QUALITY, SAFETY & COMPLIANCE

---

## Certified Professionals

All welders, fitters, and engineers hold international certifications and are trained by major OEMs.

## Environmental Responsibility

Our demucking and cleaning processes strictly adhere to MARPOL standards, ensuring safe disposal and eco-friendly operations.

## Safety First

We maintain a rigorous "Confined Space" safety protocol, essential for the high-risk nature of tank cleaning and engine room repairs.

## Class-Approved Standards

Every repair is executed to meet the stringent requirements of required classification societies.

# Strategic Partnership & Market Expansion

## Local Intelligence & Network

- We act as your eyes and ears in Turkey, utilizing our deep-rooted connections within Turkish shipyards to identify high-value opportunities before they reach the open market.

## Consultancy-Led Growth

- Beyond simple sales, we provide technical advisory to local shipowners and shipyards, positioning our distributors' solutions as the gold standard for operational excellence and technical risk mitigation

## Regulatory & Cultural Navigation:

- We streamline the complexities of the Turkish maritime sector, ensuring demanded engineering standards are seamlessly integrated with local class requirements and operational habits.
